Section 1: Identification

Safety Data Sheet

Issue Date: Revised Date:

Page 1 of 14

1.1 Product identification				
Product identifier	:	Mixture		
Product name	:	PROMASTER (Z) G-6/5 [Colorant]		
Product code	:	Not available		
Recommended uses	:	Cosmetics - Hair Coloring Product		
Restrictions on uses	:	No information available		
1.2 Identification of company				
Manufacturer/Supplier name	:	Hoyu America Co.		
Division	:			
Address	:	6265 Phyllis Drive Cypress, CA 90630 US		
Telephone number	:	714-230-3000		
FAX number	:	714-230-3060		
E-mail	:	info@hoyu-usa.com		
1.3 Emergency telephone number	:	1-800-848-4980		
1.4 Reference number	:	20-0035(US)		
Section 2: Hazard Identification				
2.1 Classification of the substance or	r mi	ixture		
2.1.1 Physico-Chemical hazard				
Flammable Solids			:	N
2.1.2 Health Hazard				
Acute toxicity (Oral)			:	N
Acute toxicity (Dermal)			:	Ν
Acute toxicity (inhalation: d	usts	s/mists)	:	N
Skin corrosion/irritation			:	C

S

2.1 Classification of the substance or mixture	
2.1.1 Physico-Chemical hazard	
Flammable Solids	: Not classified
2.1.2 Health Hazard	
Acute toxicity (Oral)	: Not classified
Acute toxicity (Dermal)	: Not classified
Acute toxicity (inhalation: dusts/mists)	: Not classified
Skin corrosion/irritation	: Category 2
Serious eye damage/irritation	: Category 1
Respiratory sensitization	: Not classified
Skin sensitization	: Category 1
Mutagenicity	: Not classified
Reproductive toxicity	: Not classified
Aspiration hazard	: Not classified
Specific target organ toxicity (single exposure)	: Category 1
Specific target organ toxicity (repeated exposure)	: Not classified
2.1.3 Environmental Hazard	

Acute environmental toxicity

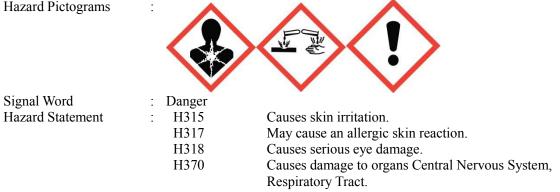

: Not classified

* For those not listed on "2.1 Classification of the Substance or Mixture" are either "Not Applicable" or "Classification not Possible."

* Hazard identification is made according to the 2012 OSHA communication Standard (29 CFR 1910.1210) and GHS rev. 7.

2.2 Label Element

Hazard Pictograms

Precautionary Statement

General Precautions	:	P101	If medical advice is needed, have product container or label at hand.
		P102	Keep out of reach of children.
		P103	Read label before use.
Preventions		P264	
rieventions	•	F 204	Wash face, hands and any exposed skin thoroughly after handling.
		P280	Wear protective gloves/protective clothing/eye protection/face protection.
		P272	Contaminated work clothing should not be allowed out of the workplace.
		P260	Do not breathe dust/fume/gas/mist/vapors/spray.
		P270	Do not eat, drink or smoke when using this product.
Responses	:	P302+P352	IF ON SKIN: Wash with plenty of water.
1		P321	Specific treatment (see section 4 on this SDS).
		P362+P364	Take off contaminated clothing and wash it before reuse.
		P305+P354+	IF IN EYES: Immediately rinse with water for
		P338	several minutes. Remove contact lenses, if present and easy to do. Continue Rinsing.
		P317	Get medical help.
		P333+P317	If skin irritation or rash occurs: Get medical help.
		P308+P316	IF exposed or concerned: Get emergency medical
			help immediately.
Storage	:	P405	Store locked up.
Disposal	:	P501	Dispose of contents/container to an approved waste
1		-	disposal plant in accordance with
			local/regional/national/international regulations.

2.3 Other hazards

2.6% of the mixture consists of ingredient(s) of unknown acute toxicity (oral).Harmful to aquatic life with long lasting effects.Repeated or prolonged skin contact may cause allergic reactions with susceptible persons.

Use of alcoholic beverages may enhance toxic effects.

Section 3: Composition/Information on Ingredients 3.1 Substance :

Section 4 : First-aid Measures

4.1 Description of First Aid Measures

Inhalation	: Remove to fresh air. Get medical attention immediately if symptoms occur.
Skin Contact	: Wash off immediately with soap and plenty of water for at least 15 minutes. May cause an allergic skin reaction. In the case of skin irritation or allergic reactions see a physician.
Eye Contact	: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes keep eye wide open while rinsing. Remove contact lenses, if present and easy to do. Continue rinsing. Do not rub affected area. Seek immediate medical attention/advice.
Ingestion	: Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. DO NOT induce vomiting. Call a physician.
4.2 Most Important	Symptoms/Effects
A outo	· Durning consistion itaking respect and/or hives

Acute : Burning sensation, itching, rashes, and/or hives.

Delayed : Burning sensation, itching, rashes, and/or hives.

4.3 Protection for Person who gives First-Aids

Avoid contact with skin, eyes or clothing. Use personal protective equipment as required. Wear personal protective clothing (see section 8).

4.4 Indication of Immediate Medical Attention and Special Treatment Needed Show this safety data sheet to the doctor in attendance. Immediate medical attention is required. May cause sensitization of susceptible persons. Treat symptomatically.

Section 5: Fire-Fighting Measures

5.1 Extinguishing Media		
Suitable Extinguishing Media	:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Inappropriate Extinguish Media	:	No information available.
5.2 Specific Hazards Arising from the Chemicals	:	Thermal decomposition can lead to release of irritating gases and vapors.
5.3 Special Extinguishing Method	:	Sensitivity to mechanical impact: No Sensitivity to static discharge: No
5.4 Special Protective Actions for Fire-fighter	:	As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Section 6: Accidental Release Measures

6.1 Personal Precautions, Protective Equipment and Emergency Procedures

Protective Equipment	:	Refer to protective measures listed in Section 7 and 8. Prevent
		further leakage or spillage if safe to do so.
Appropriate Procedure	:	Avoid contact with skin, eyes or clothing. Ensure adequate
		ventilation. Use personal protective equipment as required.
Emergency Procedure	:	Evacuate personnel to safe areas.
6.2 Environmental Precautions	:	Refer to protective measures listed in Section 7 and 8. Prevent

	<u> </u>	

Page	4 o	f 14	ł

OSHA PEL

		further leakage or spillage if safe to do so.		
6.3 Methods and Materials for Containment and Cleaning up				
For Containment	:	Prevent further leakage or spillage if safe to do so.		
For Cleaning up	:	Soak up with inert absorbent material. Pick up and transfer to properly labeled containers.		
Other Information	:	Not available		
Section 7: Handling and Storage				
7.1 Precautions for Safe Handling				
General Precautions	:	Use personal protection equipment. Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Take off contaminated clothing and wash before reuse.		
General Hygiene	:	Do not eat, drink or smoke when using this product.		
7.2 Conditions for Safe Storage				
General Information	:	Keep containers tightly closed in a dry, cool and well-ventilated place. Store locked up. Keep out of the reach of children.		
Storage Conditions	:	Do not store with strong acids, strong oxidizing agents and/or strong bases.		
Other Information	:	Not available		

Section 8: Exposure Controls/Personal Protection 8.1 Occupational Exposure Limits

8.2 Engineering Controls	: Showers Eyewash station Ventilation system
8.3 Individual Protection Measures	
Eye/Face Protection	: Tight sealing safety goggles.
Skin Protection	: Wear protective gloves and protective clothing. Long sleeved clothing. Impervious gloves.
Respiratory Protection	: No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.
Thermal Hazard	: Not available
Other Requirements	: Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/face protection. Do not eat, drink or smoke when using this product. Wash hands before breaks and immediately after handling the products.

Section 9: Physical and Chemical Properties

Physical State		Solid (Cream)

Hazardous Decomposition Products

: Carbon oxides, ammonia, and/or nitrogen oxide.

Section 11: Toxicological Information Information on Toxicological Effects

ormation on Toxicological Effects	
Acute Toxicity :	
CETETH-30	LD50(oral, rat) = 1260 mg/kg
AMMONIUM HYDROXIDE	LD50(oral, rat) = 350 mg/kg
STEARETH-2	LD50(oral, rat) = 25000 mg/kg
AMMONIUM BICARBONATE	LD50(oral, rat) = 1576 mg/kg
BEHENTRIMONIUM	LD50(oral, rat) = 1000 mg/kg
CHLORIDE	
RESORCINOL	LD50(oral, rat) = 301 mg/kg
p-PHENYLENEDIAMINE	LD50(oral, rat) = 80 mg/kg
1	LC50(inhalation: dusts/mists, rat) = 0.92 mg/L
TOLUENE-2,5-DIAMINE	LD50(oral, rat) = 98 mg/kg
SULFATE	
p-AMINOPHENOL	LD50(oral, rat) = 671 mg/kg
4-NITRO-0-PHENYLENEDIAMI	LD50(oral, rat) = 681 mg/kg
NE	
Skin Corrosion/Irritation :	
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 20 % aq. Sol.) (SIDS 2008).
BEHENTRIMONIUM	Corrosive to skin. Low concentration solution (1%) causes skin
CHLORIDE	irritation, and high concentration solutions ($\geq 10\%$) may cause
CHEORIDE	inflammation, rash, etc. $(= 10\%)$ may cause
RESORCINOL	
RESORCINOL	In the skin irritation test in which this substance was applied to
	rabbits for 24 hours, there were reports of skin irritation scores
	4.4 and 5.4, and scars and necrosis of the necrotic part were
	observed 14 days after application (SIDS (2009), DFGOT vol.
	20 (2003), CICAD 71 (2006)).
	In addition to reports that epidemiological investigations of 268
	human subjects showed a direct relationship between the
	occurrence of dermatitis and this substance exposure (NTP TR
	403 (1992), ACGIH (7 th, 2001)) . Multiple dermatitis due to
	this substance exposure has been reported (SIDS (2009),
	PATTY (6 th, 2012)).
p-PHENYLENEDIAMINE	Slightly irritant at 2.5 % and moderately irritant at $10 - 50$ %
	on rabbit and its PII was 1.4 – 3.4 (BUA 97, 1995).
AMODIMETHICONE	Causes skin irritation.
p-AMINOPHENOL	The skin irritation test using rabbits was reported that mild
	edema was induced 24 hours after application and recovered
	within 72 hours (primary stimulation score 0.2 (maximum
	value 8)) (SIAP 2010, HSDB Access on May 2017).
4-NITRO-o-PHENYLENEDIAMI	Irritant.
NE	
FRAGRANCE	No information available
Serious Eye Damage/Irritation :	
PEG-32	Mild irritant (rabbit), but recovered within 24 to 48 hrs.
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 28.5 % aq. Sol.) (HSDB (Access on June
	2014)).
BEHENTRIMONIUM	Low concentration solution $(0.1 - 1\%)$ is strongly irritant to
CHLORIDE	eyes, and high concentration solutions ($\geq 10\%$) may cause
	severe burnings with turbidity or angiogenesis.

PARAFFIN	Slightly or mild irritant (rabbit, IUCLID, 2000 and RTECS, 2008).
RESORCINOL	In the eye irritation test using rabbit, there are reports that
	non-recovering conjunctivitis, iritis, corneal opacity
	occurred(SIDS (2009)). Also there were reports that
	nonrecorescious ulcer has developed (ACGIH (7th, 2001)). In
	addition, the irritation score is reported as 39.9-56.3 and 105
	(maximum value 110) (SIDS (2009), CICAD 71 (2006)).
p-PHENYLENEDIAMINE TOLUENE-2,5-DIAMINE	Slightly irritant (Draize, rabbit) (BUA 97, 1995). In the test using rabbits, "mild response to conjunctiva" was
SULFATE	observed (HSDB, 2002).
AMODIMETHICONE	Causes serious eye damage.
ISOPROPYL ALCOHOL	Mild to strong irritation (rabbit) (EHC, 1990, SIDS, 2002,
	PATTY 6th, 2012, and ECETOC TR48, 1998).
p-AMINOPHENOL	There is a report that it is irritating to human eyes (HSDB
	Access on May 2017) and a report that mild irritancy was seen
	in eye irritation test using rabbits (SIAP 2010, HSDB Access
	on May 2017)
4-NITRO-0-PHENYLENEDIAMI NE	No specific information given on the SDS from manufacturer.
FRAGRANCE	No information available
SODIUM SULFITE Respiratory or Skin Sensitization :	Causes eye irritation. Slight irritation on rabbit eyes.
RESORCINOL	There was a report that the positive rate was seen to be 30% or
RESORCEIVOE	more in skin sensitization test using guinea pig (OECD TG
	406, GLP compliant) (SIDS (2009), DFGOT vol. 20 (2003)).
p-PHENYLENEDIAMINE	There are reports of workers who caused allergic asthma due to
	occupational exposure, inflammation in the pharynx due to
	direct stimulation. Also there is a report of asthma occurring
	due to exposure 3 months - 10 years even with a small amount
	(ACGIH (2001)). There is another report that this substance
	was sensitized to the skin and the respiratory tract which may cause asthma (PATTY (5th, 2001)).
	Listed as sensitizing substance at Japan Society for
	Occupational Health.
p-AMINOPHENOL	There was a report causing bronchial asthma (HSDB (Access
•	on May 2017). It is stated that this substance is contained in
	hair dye and is a causative substance of contact dermatitis to
	barber and consumer (Contact Dermatitis 5th ed., 2011) and
	there are multiple case report on skin sensitization potential of
A NITDO - DHENNI ENEDIAMI	this substance (SCCS 2011).
4-NITRO-0-PHENYLENEDIAMI NE	May cause sensitization by skin contact.
FRAGRANCE	No information available
Germ Cell Mutagenicity :	
p-AMINOPHENOL	Negative results were reported by in vivo domestic lethal test
-	in rat and in vitro gene mutation test, but positive results are
	reported by in vivo micronucleus test in mouse, in vitro mouse
	lymphoma test and chromosome aberration test (Existing
	chemical toxicity database of Ministry of Health, Labor and
	Welfare access on May 2017, SIDS 2010, Patty 6th 2012, NTP DB access on May 2017)
Carcinogenicity :	No information available
caremogementy .	
Reproductive Toxicity :	

Issue Date: Revised Date: 2020/3/31

Page 8 of 14

ISOPROPYL ALCOHOL	Two generation test on rat by oral exposure showed decrease in copulation rate on parent and decrease in weight and increase in death rate (PATTY 6th 2012 and SIDS (2002))
p-AMINOPHENOL	in death rate (PATTY 6th, 2012 and SIDS (2002)). In a simple reproductive toxicity test by forced oral administration using rats, death of parental animals was seen (male 4/12 and female 2/12). Regression stop of sex cycle, extension of gestation periods, poor delivery rate and nursing behaviors were seen in parental rats that showed suppression on weight gain at a dose of 500 mg/kg/day. Its offsprings showed increased stillbirth, lower fertility rate and survival rate within first 4 days. (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, SCCS 2011). On the other hand, the developmental toxicity test administered a dose mixed feeds to a pregnant rats on 0 to 20th days, increase in fetal death after implantation at dose lower than the dose showing suppression of weight gain to the mother animals was seen, but fetus did not show increase in teratogenesis although it showed skeletal morphogenesis and undeveloped renal papilla due to growth retardation (SIDS 2010, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006). However, as a result of forced oral administrations during the organ formation periods of pregnant rat, the mother animal showed suppression of weight gain at dose greater than 85 mg/kg/day and teratogenicity in fetus, such as skeletal malformations, asthma, hydrocephalus, at dose of 250 mg/kg/day (SCCS 2011). A test administered forcefully single oral dose to pregnant rats at 11th day of pregnancy showed abnormality in their tail at a dose showing the suppression of weight gain on mother animals (SIDS 2010, Risk Assessment by Ministry of the Environment Vol. 5:
	Temporary Hazard Assessment Sheet 2006). There was a report that pregnant hamsters administered showed no teratogenicity by oral administration but external malformation such as cerebral aneurysms and ocular or tail malformations were seen (SIDS 2010, Patty 6th, 2012, SCCS 2011, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006).
STOT – Single Exposure : 4-NITRO-o-PHENYLENEDIAMI	May cause respiratory irritation.
NE	
AMMONIUM HYDROXIDE	There is known neurological effect due to oral and dermal exposure, which normally limited to blurred vision on topically applied region, but severe exposure causes increase in concentration of blood ammonia, attack, coma, nonspecific diffuse brain disorder, loss in muscle strength, decreased deep tendon reflex, loss of consciousness, and death (ATSDR, 2004). This substance has a respiratory irritation and causes severe irritation and pain on airway mucosa. Also, severe corrosive effects are known for mouth, throat and stomach by oral route (HSDB, 2014).
ISOPROPYL ALCOHOL	This substance showed systematic hazardous effect including the central nervous depression such as lethargy, coma and respiratory depression, irritation on the alimentary canal, effect

Issue Date: Revised Date: Page 9 of 14

on the circulatory system such as blood pressure, body temperature decrease, and abnormal cardiac rhythm (SIDS (2002), EHC 103 (1990)). PARAFFIN Wax fume is mild irritant on eyes, nose, and throat (PATTY5th. 2001) Ingestion of this substance on human showed breathing p-PHENYLENEDIAMINE difficulty and edema on face, neck, tongue and throat, increase of CPK in blood, hypouresis, renal tubular degeneration and rhabdomyolysis. Then, subject caused acute kidney failure and death (DFGMAK-Doc.6, 1994). RESORCINOL This substance has multiple human poisoning cases. After using ointment or cream (50% of this substance, 100 g) for the treatment of skin diseases, methemoglobinemia, cyanosis, convulsions due to loss of consciousness, tremor, convulsion, mydriasis, confusion, amnesia, disorientation were observed. In oral ingestion and percutaneous absorption poisoning cases of infants, burning sensation, convulsions, central nervous system disorder (dizziness, confusion, somnolence, disorientation, disorientation, memory loss, tremor), red blood cell change (methemoglobinemia, hemolytic anemia, hemoglobinuria, cvanosis), etc. were observed (ACGIH (7th, 2001), CICAD 71 (2006), IARC 71 (1999), PATTY (6th, 2012), DFGOT Vol. 20 (2003)). In experimental animals, in oral administration on rats salivation, hyperexcitability, tachypnea, ptosis, lethargy, abnormal gait, lying position, tremor, dyspnea, tremor, convulsion, sedation, tonic chronic convulsion, cyanosis, etc. were reported (SIDS (2009), ACGIH (7th, 2001), DFGOT Vol. 20 (2003), PATTY (6th, 2012), CICAD 71 (2006)). STOT - Repeated Exposure ISOPROPYL ALCOHOL Vapor exposure of this substance on rat for 4 month showed decrease in number of leucocyte at 100 mg/m³, and pathologic effect on organs of respiration such as lung and respiratory tract, liver and spleen at 500 mg/m³ (EHC 103 (1990)). MINERAL OIL Effects on liver and mesenteric node by repeated oral exposure test using rat (IUCLID, 2000) and on lung due to aerosol exposure on rat (US HPVIS, 2011). There is no clear report on humans. p-AMINOPHENOL In the 28-day repeated dose toxicity study by oral gavage using rats, brown urine, urinary sediment epithelial cells, absolute and relative weight values of kidney, basophilic tubule were seen at 100 mg/kg/day which is equivalent to 31 mg/kg/day for 90-day study, and lower red blood cells, hematocrit value and hemoglobin concentration, a high value of reticulocyte count, a liver weight increase, a white streak at the kidney corticosterum, spleen extramedullary hematopoiesis, and spleen hemosiderin pigment were seen at 500 mg/kg/day which is equivalent to 156 mg/kg/day for 90-day study (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, Ministry of the Environment Risk Assessment Vol. 5: Temporary Hazard Assessment Sheet 2006). In addition, in a 6-month repeated oral does toxicity study using rats, nephropathy was sheen at dose greater than 35 mg/kg/day and suppression of weight gain, decrease in number of red blood cells and concentration of hemoglobin (Ministry

Toxicity on Aquatic Organisms

Issue Date: 2020/3/31 Revised Date: Page 11 of 14

AMMONIUM HYDROXIDE AMMONIUM BICARBONATE BEHENTRIMONIUM CHLORIDE RESORCINOL p-PHENYLENEDIAMINE POLYQUATERNIUM-4 p-AMINOPHENOL FRAGRANCE	LC50 (Mysidopsis bahia, 96 hrs.) = $2.81 - 98.9$ mg total NH ₃ /L (SIDS, 2007) LC50 (96 hrs., Oncorhynchus mykiss)=17300 µg/L EC50(Daphnia magna, 48 hrs.) = 0.16 mg/kg EC50 (Daphnia magna, 48 hrs.) = 1.28 mg/L LC50 (Oryzias latipes, 96 hrs.) = 0.066 mg/L NOEC (Daphnia magna, 21 days) = 0.043 mg/L No information available EC50 (Pseudokirchneriella subcapitata, 72 hrs.) = 0.1 mg/L NOEC (Pseudokirchneriella subcapitata, 72 hrs.) = 0.025 mg/L No specific information given on the SDS from manufacturer. No information available
Toxicity on Terrestrial Organisms :	No information available.
Persistence and Degradability : BEHENTRIMONIUM CHLORIDE RESORCINOL MINERAL OIL p-PHENYLENEDIAMINE POLYQUATERNIUM-4 p-AMINOPHENOL Bioaccumulative Potential :	BOD = 0% BOD = 66.7% Persistent (IUCLID, 2000) BOD = 5% No information available BOD = 6%
BEHENTRIMONIUM CHLORIDE RESORCINOL MINERAL OIL POLYQUATERNIUM-4 p-AMINOPHENOL	Low bioaccumulation log Kow = 0.8 Log Pow > 6 (IUCLID, 2000) No information available BCF = 46
Mobility in Soil :	No information available.
Other Adverse Effects :	No information available.

Section 13: Disposal Considerations

Product/Packaging Disposal : This material, as supplied, is not a hazardous	waste
according to Federal regulation (40 CFR 261) could become a hazardous waste if it is mixed otherwise comes in contact with a hazardous chemical additions are made to this material, material is processed or otherwise altered. Co 261 to determine whether the altered material waste. Consult the appropriate state, regional, regulations for additional requirements.). This material d with or waste, if or if the onsult 40 CFR l is a hazardous
Waste Treatment-Relevant Information: No information available.Sewage Disposal-Relevant Information: No information available.	
Other Disposal Recommendation: Dispose of contents/containers in accordance regulation (refer to Section 15).	with local

Section 15: Regulatory Information				
Safety, Health, and Environmental Regulation	ons Specific for the H	roduct		
International chemical inventories	1			
Toxic substances control act (TSCA)	: All components of this product are either listed or are			
· · · · · · · · · · · · · · · · · · ·	exempt on the TS			
Domestic Substance list (DSL)		: Substances comply or are exempt.		
US Federal Regulation	-			
	Section 313 of Title III of the Superfund Amendments and			
and Reauthorization act of 1986	Reauthorization act of 1986 (SARA). This product contains			
(SARA 313)	a chemical or chemicals which are subject to the reporting			
		he act and title 40 of	the Code of Federal	
	Regulations (CF	R), Part 372.		
Chemical Name		ARA 313 – Threshold	values (%)	
AMMONIUM HYDROXIDE		0 as ammonia		
p-PHENYLENEDIAMINE	1.			
ISOPROPYL ALCOHOL	1.			
SARA 311/312 Hazard Category	: Acute health haz		Yes	
	Chronic health h	azard	No	
	Fire hazard	0 1 1	No	
		f pressure hazard	No	
	Reactive hazard		No	
Clean Water Act (CWA)			which are regulated as	
G_{1}		t to the Clean Water		
Clean Air Act (CAA)		it to the Clean Air Ac	which are regulated as	
Comprehensive Environmental				
Response Compensation and Liability	: This material, as supplied, contains one or more substances regulated as hazardous substance under the Comprehensive			
Act (CERCLA)		esponse Compensatio		
	(40 CFR 302).	esponse compensation	In and Liaonity Act	
Hazardous Substance	Statutory Code*	RCRA Waste No.	Final RQ Pounds	
AMMONIUM HYDROXIDE	1	-	1000 lb (454 kg)	
AMMONIUM BICARBONATE	1	-	5000 lb (2270 kg)	
RESORCINOL	1, 4	U201	5000 lb (2270 kg)	

* According to 40 CFR 302, The "Statutory Code" column indicates the statutory source for designating each substance as a CERCLA hazardous substance:

3

"1" indicates that the statutory source is section 311(b)(2) of the Clean Water Act,

"2" indicates that the source is section 307(a) of the Clean Water Act,

p-PHENYLENEDIAMINE

"3" indicates that the source is section 112 of the Clean Air Act, and

"4" indicates that the source is section 3001 of the Resource Conservation and Recovery Act (RCRA). **US State Regulations**

California Hazardous Waste Code : 135 (unspecified aqueous solution)

This product contains one or more substances that are listed with the state of California as hazardous waste.

Chemical Name	California Hazardous Waste Code
AMMONIUM HYDROXIDE	X, C
