Section 1: Identification

Page	1	of	14	

1.1 Product identification		
Product identifier	:	Mixture
Product name	:	PROMASTER (Z) N-4/3 [Colorant]
Product code	:	Not available
Recommended uses	:	Cosmetics - Hair Coloring Product
Restrictions on uses	:	No information available
1.2 Identification of company		
Manufacturer/Supplier name	:	Hoyu America Co.
Division	:	
Address	:	6265 Phyllis Drive Cypress, CA 90630 US
Telephone number	:	714-230-3000
FAX number	:	714-230-3060
E-mail	:	info@hoyu-usa.com
1.3 Emergency telephone number	:	1-800-848-4980
1.4 Reference number	:	20-0008(US)

Section 2: Hazard Identification

2.1 Classification of the substance or mixture	
2.1.1 Physico-Chemical hazard	
Flammable Solids	: Not classified
2.1.2 Health Hazard	
Acute toxicity (Oral)	: Not classified
Acute toxicity (Dermal)	: Not classified
Acute toxicity (inhalation: dusts/mists)	: Not classified
Skin corrosion/irritation	: Category 2
Serious eye damage/irritation	: Category 1
Respiratory sensitization	: Not classified
Skin sensitization	: Category 1
Mutagenicity	: Not classified
Reproductive toxicity	: Not classified
Aspiration hazard	: Not classified
Specific target organ toxicity (single exposure)	: Category 1
Specific target organ toxicity (repeated exposure)	: Not classified
2.1.3 Environmental Hazard	
a construction of the second	

Acute environmental toxicity

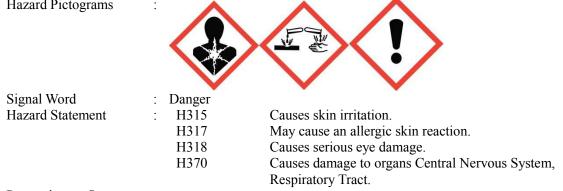

: Not classified

* For those not listed on "2.1 Classification of the Substance or Mixture" are either "Not Applicable" or "Classification not Possible."

* Hazard identification is made according to the 2012 OSHA communication Standard (29 CFR 1910.1210) and GHS rev. 7.

2.2 Label Element

Hazard Pictograms

Precautionary Statement

Issue Date: 2020/3/31 Revised Date:

Page	2	of	14

General Precautions	:	P101	If medical advice is needed, have product container or label at hand.
		P102	Keep out of reach of children.
		P102	Read label before use.
Preventions	:	P264	Wash face, hands and any exposed skin thoroughly after handling.
		P280	Wear protective gloves/protective clothing/eye protection/face protection.
		P272	Contaminated work clothing should not be allowed out of the workplace.
		P260	Do not breathe dust/fume/gas/mist/vapors/spray.
		P270	Do not eat, drink or smoke when using this product.
Responses	:	P302+P352	IF ON SKIN: Wash with plenty of water.
•		P321	Specific treatment (see section 4 on this SDS).
		P362+P364	Take off contaminated clothing and wash it before
			reuse.
		P305+P354+	IF IN EYES: Immediately rinse with water for
		P338	several minutes. Remove contact lenses, if present and easy to do. Continue Rinsing.
		P317	Get medical help.
		P333+P317	If skin irritation or rash occurs: Get medical help.
		P308+P316	IF exposed or concerned: Get emergency medical
			help immediately.
Storage	:	P405	Store locked up.
Disposal	:	P501	Dispose of contents/container to an approved waste
-			disposal plant in accordance with
			local/regional/national/international regulations.

2.3 Other hazards

2.6% of the mixture consists of ingredient(s) of unknown acute toxicity (oral).Harmful to aquatic life with long lasting effects.Repeated or prolonged skin contact may cause allergic reactions with susceptible persons.

Use of alcoholic beverages may enhance toxic effects.

Section 3: Composition/Information on Ingredients

Section 4 : First-aid Measures

4.1 Description of First Aid Measures

	1st / Hu Wedsules
Inhalation	: Remove to fresh air. Get medical attention immediately if symptoms occur.
Skin Contact	: Wash off immediately with soap and plenty of water for at least 15 minutes. May cause an allergic skin reaction. In the case of skin irritation or allergic reactions see a physician.
Eye Contact	: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes keep eye wide open while rinsing. Remove contact lenses, if present and easy to do. Continue rinsing. Do not rub affected area. Seek immediate medical attention/advice.
Ingestion	: Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. DO NOT induce vomiting. Call a physician.
4.2 Most Important S	Symptoms/Effects
Acute	: Burning sensation, itching, rashes, and/or hives.
Delayed	: Burning sensation, itching, rashes, and/or hives.
4.3 Protection for Pe	rson who gives First-Aids
Avoid contact wit	the skin eves or clothing. Use personal protective equipment as required. Wear personal

Avoid contact with skin, eyes or clothing. Use personal protective equipment as required. Wear personal protective clothing (see section 8).

4.4 Indication of Immediate Medical Attention and Special Treatment Needed Show this safety data sheet to the doctor in attendance. Immediate medical attention is required. May cause sensitization of susceptible persons. Treat symptomatically.

Section 5: Fire-Fighting Measures

5.1 Extinguishing Media		
Suitable Extinguishing Media	:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Inappropriate Extinguish Media	:	No information available.
5.2 Specific Hazards Arising from	:	Thermal decomposition can lead to release of irritating gases and
the Chemicals		vapors.
5.3 Special Extinguishing Method	:	Sensitivity to mechanical impact: No
		Sensitivity to static discharge: No
5.4 Special Protective Actions for	:	As in any fire, wear self-contained breathing apparatus
Fire-fighter		pressure-demand, MSHA/NIOSH (approved or equivalent) and
		full protective gear.

Section 6: Accidental Release Measures

6.1 Personal Precautions, Protective	Equ	ipment and Emergency Procedures
Protective Equipment	:	Refer to protective measures listed in Section 7 and 8. Prevent
		further leakage or spillage if safe to do so.
Appropriate Procedure	:	Avoid contact with skin, eyes or clothing. Ensure adequate
		ventilation. Use personal protective equipment as required.
Emergency Procedure	:	Evacuate personnel to safe areas.
6.2 Environmental Precautions	:	Refer to protective measures listed in Section 7 and 8. Prevent
		further leakage or spillage if safe to do so.

6.3 Methods and Materials for Containment and Cleaning up	
---	--

	eı
For Containment	: Prevent further leakage or spillage if safe to do so.
For Cleaning up	: Soak up with inert absorbent material. Pick up and transfer to
	properly labeled containers.
Other Information	: Not available

Section 7: Handling and Storage 7.1 Precautions for Safe Handlin

7.1 Precautions for Safe Handling	
General Precautions	: Use personal protection equipment. Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Take off contaminated clothing and wash before reuse.
General Hygiene	: Do not eat, drink or smoke when using this product.
7.2 Conditions for Safe Storage	
General Information	: Keep containers tightly closed in a dry, cool and well-ventilated place. Store locked up. Keep out of the reach of children.
Storage Conditions	: Do not store with strong acids, strong oxidizing agents and/or strong bases.
Other Information	: Not available

Section 8: Exposure Controls/Personal Protection

·

Section 11: Toxicological Information

ection 11: Toxicological Information	
Information on Toxicological Effects	
Acute Toxicity	
CETETH-30	LD50(oral, rat) = 1260 mg/kg
AMMONIUM HYDROXIDE	LD50(oral, rat) = 350 mg/kg
STEARETH-2	LD50(oral, rat) = 25000 mg/kg
TOLUENE-2,5-DIAMINE	LD50(oral, rat) = 25000 mg/kg
SULFATE	
	1.050(am1,mt) = 1000,ms/lex
BEHENTRIMONIUM	LD50(oral, rat) = 1000 mg/kg
CHLORIDE	
RESORCINOL	LD50(oral, rat) = 301 mg/kg
m-AMINOPHENOL	LD50(oral, rat) = 693 mg/kg
p-PHENYLENEDIAMINE	LD50(oral, rat) = 80 mg/kg
	LC50(inhalation: dusts/mists, rat) = 0.92 mg/L
p-AMINOPHENOL	LD50(oral, rat) = 671 mg/kg
Skin Corrosion/Irritation	:
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 20 % aq. Sol.) (SIDS 2008).
BEHENTRIMONIUM	Corrosive to skin. Low concentration solution (1%) causes skin
CHLORIDE	irritation, and high concentration solutions ($\geq 10\%$) may cause
	inflammation, rash, etc.
RESORCINOL	In the skin irritation test in which this substance was applied to
	rabbits for 24 hours, there were reports of skin irritation scores
	4.4 and 5.4, and scars and necrosis of the necrotic part were
	observed 14 days after application (SIDS (2009), DFGOT vol.
	20 (2003), CICAD 71 (2006)).
	In addition to reports that epidemiological investigations of 268
	human subjects showed a direct relationship between the
	occurrence of dermatitis and this substance exposure (NTP TR
	403 (1992), ACGIH (7 th, 2001)) . Multiple dermatitis due to
	this substance exposure has been reported (SIDS (2009),
	PATTY (6 th, 2012)).
p-PHENYLENEDIAMINE	Slightly irritant at 2.5 % and moderately irritant at $10 - 50$ %
	on rabbit and its PII was 1.4 – 3.4 (BUA 97, 1995).
AMODIMETHICONE	Causes skin irritation.
p-AMINOPHENOL	The skin irritation test using rabbits was reported that mild
p mini (of mer (of	edema was induced 24 hours after application and recovered
	within 72 hours (primary stimulation score 0.2 (maximum
	value 8)) (SIAP 2010, HSDB Access on May 2017).
FRAGRANCE	No information available
	No information available
Serious Eye Damage/Irritation	
PEG-32	Mild irritant (rabbit), but recovered within 24 to 48 hrs.
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 28.5 % aq. Sol.) (HSDB (Access on June
	2014)).
TOLUENE-2,5-DIAMINE	In the test using rabbits, "mild response to conjunctiva" was
SULFATE	observed (HSDB, 2002).
BEHENTRIMONIUM	Low concentration solution (0.1 - 1%) is strongly irritant to
CHLORIDE	
CHLOKIDE	eyes, and high concentration solutions ($\geq 10\%$) may cause
	severe burnings with turbidity or angiogenesis.
PARAFFIN	Slightly or mild irritant (rabbit, IUCLID, 2000 and RTECS,
	2008).
RESORCINOL	In the eye irritation test using rabbit, there are reports that

Issue Date: Revised Date: 2020/3/31

Page 7 of 14

	non-recovering conjunctivitis, iritis, corneal opacity occurred (SIDS (2009)). Also there were reports that nonrecorescious ulcer has developed (ACGIH (7th, 2001)). In addition, the irritation score is reported as 39.9-56.3 and 105 (maximum value 110) (SIDS (2009), CICAD 71 (2006)).
p-PHENYLENEDIAMINE	Slightly irritant (Draize, rabbit) (BUA 97, 1995).
AMODIMETHICONE	Causes serious eye damage.
ISOPROPYL ALCOHOL	Mild to strong irritation (rabbit) (EHC, 1990, SIDS, 2002, PATTY 6th, 2012, and ECETOC TR48, 1998).
p-AMINOPHENOL	There is a report that it is irritating to human eyes (HSDB Access on May 2017) and a report that mild irritancy was seen in eye irritation test using rabbits (SIAP 2010, HSDB Access on May 2017)
FRAGRANCE	No information available
SODIUM SULFITE	Causes eye irritation. Slight irritation on rabbit eyes.
Respiratory or Skin Sensitization	
RESORCINOL	There was a report that the positive rate was seen to be 30% or more in skin sensitization test using guinea pig (OECD TG 406, GLP compliant) (SIDS (2009), DFGOT vol. 20 (2003)).
p-PHENYLENEDIAMINE	There are reports of workers who caused allergic asthma due to occupational exposure, inflammation in the pharynx due to direct stimulation. Also there is a report of asthma occurring
	due to exposure 3 months - 10 years even with a small amount (ACGIH (2001)). There is another report that this substance was sensitized to the skin and the respiratory tract which may cause asthma (PATTY (5th, 2001)).
	Listed as sensitizing substance at Japan Society for Occupational Health.
p-AMINOPHENOL	There was a report causing bronchial asthma (HSDB (Access on May 2017). It is stated that this substance is contained in
	hair dye and is a causative substance of contact dermatitis to barber and consumer (Contact Dermatitis 5th ed., 2011) and there are multiple case report on skin sensitization potential of this substance (SCCS 2011).
FRAGRANCE	No information available
Germ Cell Mutagenicity	
p-AMINOPHENOL	Negative results were reported by in vivo domestic lethal test in rat and in vitro gene mutation test, but positive results are reported by in vivo micronucleus test in mouse, in vitro mouse lymphoma test and chromosome aberration test (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, Patty 6th 2012, NTP
	DB access on May 2017)
Carcinogenicity	No information available
Reproductive Toxicity	
ISOPROPYL ALCOHOL	Two generation test on rat by oral exposure showed decrease in copulation rate on parent and decrease in weight and increase in death rate (PATTY 6th, 2012 and SIDS (2002)).
p-AMINOPHENOL	In a simple reproductive toxicity test by forced oral administration using rats, death of parental animals was seen (male 4/12 and female 2/12). Regression stop of sex cycle, extension of gestation periods, poor delivery rate and nursing behaviors were seen in parental rats that showed suppression on weight gain at a dose of 500 mg/kg/day. Its offsprings

Issue Date: 2020/3/31 Revised Date:

Page 8 of 14

showed increased stillbirth, lower fertility rate and survival rate
within first 4 days. (Existing chemical toxicity database of
Ministry of Health, Labor and Welfare access on May 2017,
SIDS 2010, SCCS 2011).
On the other hand, the developmental toxicity test administered
a dose mixed feeds to a pregnant rats on 0 to 20th days,
increase in fetal death after implantation at dose lower than the
dose showing suppression of weight gain to the mother animals
was seen, but fetus did not show increase in teratogenesis
although it showed skeletal morphogenesis and undeveloped
renal papilla due to growth retardation (SIDS 2010, Risk
Assessment by Ministry of the Environment Vol. 5: Temporary
Hazard Assessment Sheet 2006).
However, as a result of forced oral administrations during the
organ formation periods of pregnant rat, the mother animal
showed suppression of weight gain at does greater than 85
mg/kg/day and teratogenicity in fetus, such as skeletal
malformations, asthma, hydrocephalus, at dose of 250
mg/kg/day (SCCS 2011). A test administered forcefully
single oral dose to pregnant rats at 11th day of pregnancy
showed abnormality in their tail at a dose showing the
suppression of weight gain on mother animals (SIDS 2010,
Risk Assessment by Ministry of the Environment Vol 5

single oral dose to pregnant rats at 11th day of pregnancy showed abnormality in their tail at a dose showing the suppression of weight gain on mother animals (SIDS 2010, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006). There was a report that pregnant hamsters administered showed no teratogenicity by oral administration but external malformation such as cerebral aneurysms and ocular or tail malformations were seen (SIDS 2010, Patty 6th, 2012, SCCS 2011, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006).

There is known neurological effect due to oral and dermal exposure, which normally limited to blurred vision on topically applied region, but severe exposure causes increase in concentration of blood ammonia, attack, coma, nonspecific diffuse brain disorder, loss in muscle strength, decreased deep tendon reflex, loss of consciousness, and death (ATSDR, 2004). This substance has a respiratory irritation and causes severe irritation and pain on airway mucosa. Also, severe corrosive effects are known for mouth, throat and stomach by oral route (HSDB, 2014). This substance showed systematic hazardous effect including

the central nervous depression such as lethargy, coma and respiratory depression, irritation on the alimentary canal, effect on the circulatory system such as blood pressure, body temperature decrease, and abnormal cardiac rhythm (SIDS (2002), EHC 103 (1990)).

Acute toxicity test (oral) on rat (OECD TG401, GLP) showed occurrence of death at 700 mg/kg or more, and thrill, salivation, brown urine, prone, and decumbence at 500 mg/kg or more. Autopsy showed enlargement of spleen due to congestion for the dead case and dark red of spleen and dark brown of kidney at 700 and 1000 mg/kg. Wax fume is mild irritant on eyes, nose, and throat (PATTY5th, 2001)

STOT – Single Exposure AMMONIUM HYDROXIDE

ISOPROPYL ALCOHOL

m-AMINOPHENOL

PARAFFIN

Issue Date: 20 Revised Date:

2020/3/31

Page 9 of 14

p-PHENYLENEDIAMINE	Ingestion of this substance on human showed breathing difficulty and edema on face, neck, tongue and throat, increase of CPK in blood, hypouresis, renal tubular degeneration and rhabdomyolysis. Then, subject caused acute kidney failure and
RESORCINOL	 death (DFGMAK-Doc.6, 1994). This substance has multiple human poisoning cases. After using ointment or cream (50% of this substance, 100 g) for the treatment of skin diseases, methemoglobinemia, cyanosis, convulsions due to loss of consciousness, tremor, convulsion, mydriasis, confusion, amnesia, disorientation were observed. In oral ingestion and percutaneous absorption poisoning cases of infants, burning sensation, convulsions, central nervous system disorder (dizziness, confusion, somnolence, disorientation, disorientation, memory loss, tremor), red blood cell change (methemoglobinemia, hemolytic anemia, hemoglobinuria, cyanosis), etc. were observed (ACGIH (7th, 2001), CICAD 71 (2006), IARC 71 (1999), PATTY (6th, 2012), DFGOT Vol. 20 (2003)). In experimental animals, in oral administration on rats salivation, hyperexcitability, tachypnea, ptosis, lethargy, abnormal gait, lying position, tremor, dyspnea, tremor, convulsion, sedation, tonic chronic convulsion, cyanosis, etc. were reported (SIDS (2009), ACGIH (7th, 2001), DFGOT Vol. 20 (2003), PATTY (6th, 2012), CICAD 71 (2006)).
	20(2003), PATTY (6th, 2012), CICAD /1 (2006)).
STOT – Repeated Exposure	:
ISOPROPYL ALCOHOL	Vapor exposure of this substance on rat for 4 month showed decrease in number of leucocyte at 100 mg/m ³ , and pathologic effect on organs of respiration such as lung and respiratory tract, liver and spleen at 500 mg/m ³ (EHC 103 (1990)).
m-AMINOPHENOL	The result of feeding test on female rat for 90 days at 0, 0.1, 0.25, and 1 %, rat applied with 1 % group which is about 500 mg/kg/day showed decrease in number of red blood cell and concentration of hemoglobin, increase in average red blood cell volume, and hemosiderosis and hemolyzing property on spleen, liver and kidney.
MINERAL OIL	Effects on liver and mesenteric node by repeated oral exposure test using rat (IUCLID, 2000) and on lung due to aerosol exposure on rat (US HPVIS, 2011).
p-AMINOPHENOL	 There is no clear report on humans. In the 28-day repeated dose toxicity study by oral gavage using rats, brown urine, urinary sediment epithelial cells, absolute and relative weight values of kidney, basophilic tubule were seen at 100 mg/kg/day which is equivalent to 31 mg/kg/day for 90-day study, and lower red blood cells, hematocrit value and hemoglobin concentration, a high value of reticulocyte count, a liver weight increase, a white streak at the kidney corticosterum, spleen extramedullary hematopoiesis, and spleen hemosiderin pigment were seen at 500 mg/kg/day which is equivalent to 156 mg/kg/day for 90-day study (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, Ministry of the Environment Risk Assessment Vol. 5: Temporary Hazard Assessment Sheet 2006). In addition, in a 6-month repeated oral does toxicity study using rats, nephropathy was sheen at dose greater than 35 mg/kg/day and suppression of weight gain , decrease in number

Issue Date: 2020/3/31 Revised Date: Page 10 of 14

p-PHENYLENEDIAMINE	of red blood cells and concentration of hemoglobin (Ministry of the Environment Risk Assessment Volume 5: Temporary Hazard Assessment Sheet 2006, PATTY 6th 2012). The regular use of retail hair coloring product containing this substance on humans caused inflammation on liver and spleen and developed progressive neurological disorders for 11 weeks and final death of subject (ACGIH, 2001). Also, the regular use of retail hair coloring product containing this substance showed chronic kidney disorder, uremia, minimization of kidney and death of subject (DFGMAK-Doc.6, 1994). 90 days oral application test on rabbit at 10 mg/kg showed edema, swollen muscle fiber, etc on myocardium (ACGIH, 2001).

Carcinogenicity :	The table below		er each agency h	as listed any
	ingredient as car			
Chemical Name	ACGIH	IARC	NTP	OSHA
ISOPROPYL ALCOHOL	A4	Group 3	-	-
p-PHENYLENEDIAMINE	A4	Group 3	-	-
RESORCINOL	A4	Group 3	-	-
MINERAL OIL	-	Group 3	-	-

ACGIH: A1 - Confirmed human carcinogen, A2 - Suspected human carcinogen, A3 - Confirmed animal carcinogen with unknown relevance to humans, A4 - Not classifiable as a human carcinogen, A5 - Not suspected as a human carcinogen

IARC: International Agency for Research and Cancer (Group 1 - Carcinogenic to humans, Group 2A -Probably Carcinogenic to humans, Group 2B – Possibly carcinogenic to humans, Group 3 – Not classifiable as to carcinogenicity in humans, Group 4 – Probably not carcinogenic to humans)

NTP: National Toxicology Program (NA = none assigned, Known = Known to be a human carcinogen, RAHC = Reasonably anticipated to be a human carcinogen)

Other Information : No information available.

Section 15: Regulatory Information					
Safety, Health, and Environmental Regulat	ions	s Specific for the Product			
International chemical inventories					
Toxic substances control act (TSCA)	:	All components of this product are either listed or are exempt on the TSCA inventory.			
Domestic Substance list (DSL)	:	Substances comply or are exempt.			
US Federal Regulation					
Title III of the Superfund Amendments	:	1			
and Reauthorization act of 1986		Reauthorization act of 1986 (SARA). This product contains			
(SARA 313)		a chemical or chemicals which are subject to the reporting			
		requirements of the act and title 40 of the Code of Federal			
		Regulations (CFR), Part 372.			
Chemical Name		SARA 313 – Threshold values (%)			
AMMONIUM HYDROXIDE		1.0 as ammonia			
p-PHENYLENEDIAMINE		1.0			
ISOPROPYL ALCOHOL		1.0			
SARA 311/312 Hazard Category	:	Acute health hazard Yes			
		Chronic health hazard No			
		Fire hazard No			
		Sudden release of pressure hazard No			
		Reactive hazard No			
Clean Water Act (CWA)	:	This product contains the substances which are regulated as			
		pollutant pursuant to the Clean Water Act (40 CFR 122).			
Clean Air Act (CAA)	:	This product contains the substances which are regulated as			
Commence on give Environmental		pollutant pursuant to the Clean Air Act (40 CFR 50 - 99).			
Comprehensive Environmental	•	This material, as supplied, contains one or more substances			

omprenensive Environmental Response Compensation and Liability Act (CERCLA)

(40 CFR 302).				
Hazardous Substance	Statutory Code*	RCRA Waste No.	Final RQ Pounds	
AMMONIUM HYDROXIDE	1	-	1000 lb (454 kg)	
RESORCINOL	1,4	U201	5000 lb (2270 kg)	
p-PHENYLENEDIAMINE	3	-	5000 lb (2270 kg)	

regulated as hazardous substance under the Comprehensive

Environmental Response Compensation and Liability Act

* According to 40 CFR 302, The "Statutory Code" column indicates the statutory source for designating each substance as a CERCLA hazardous substance:

"1" indicates that the statutory source is section 311(b)(2) of the Clean Water Act,

"2" indicates that the source is section 307(a) of the Clean Water Act,

"3" indicates that the source is section 112 of the Clean Air Act, and

"4" indicates that the source is section 3001 of the Resource Conservation and Recovery Act (RCRA). **US State Regulations**

California Hazardous Waste Code : 135 (unspecified aqueous solution)

This product contains one or more substances that are listed with the state of California as hazardous waste.

Chemical Name	California Hazardous Waste Code
AMMONIUM HYDROXIDE	X, C
