Section 1: Identification

Page	1	of 13	
1 uge		01 15	

1.1 Product identification		
Product identifier	:	Mixture
Product name	:	PROMASTER (Z) RR-7 [Colorant]
Product code	:	Not available
Recommended uses	:	Cosmetics - Hair Coloring Product
Restrictions on uses	:	No information available
1.2 Identification of company		
Manufacturer/Supplier name	:	Hoyu America Co.
Division	:	
Address	:	6265 Phyllis Drive Cypress, CA 90630 US
Telephone number	:	714-230-3000
FAX number	:	714-230-3060
E-mail	:	info@hoyu-usa.com
1.3 Emergency telephone number	:	1-800-848-4980
1.4 Reference number	:	20-0056(US)
Section 2: Hazard Identification		
2.1 Classification of the substance of	or mi	xture
2.1.1 Physico-Chemical hazard		

2.1.1 Physico-Chemical hazard		
Flammable Solids	:	Not classified
2.1.2 Health Hazard		
Acute toxicity (Oral)	:	Not classified
Acute toxicity (Dermal)	:	Not classified
Acute toxicity (inhalation: dusts/mists)	:	Not classified
Skin corrosion/irritation	:	Category 1
Serious eye damage/irritation	:	Category 1
Respiratory sensitization	:	Not classified
Skin sensitization	:	Category 1
Mutagenicity	:	Not classified
Reproductive toxicity	:	Not classified
Aspiration hazard	:	Not classified
Specific target organ toxicity (single exposure)	:	Category 1
Specific target organ toxicity (repeated exposure)	:	Not classified
2.1.3 Environmental Hazard		

Acute environmental toxicity

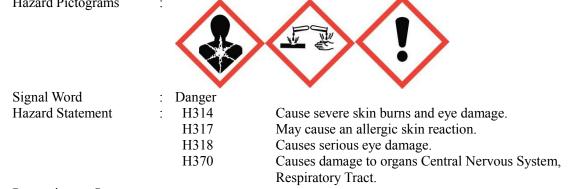

: Not classified

* For those not listed on "2.1 Classification of the Substance or Mixture" are either "Not Applicable" or "Classification not Possible."

* Hazard identification is made according to the 2012 OSHA communication Standard (29 CFR 1910.1210) and GHS rev. 7.

2.2 Label Element

Hazard Pictograms

Precautionary Statement

General Precautions		P101	If medical advice is needed, have product container
General I recautions	•	1 101	or label at hand.
		P102	Keep out of reach of children.
		P103	Read label before use.
Preventions		P260	Do not breathe dust/fume/gas/mist/vapors/spray.
1 ie ventions	•	P264	Wash face, hands and any exposed skin thoroughly
		1201	after handling.
		P280	Wear protective gloves/protective clothing/eye
			protection/face protection.
		P272	Contaminated work clothing should not be allowed
			out of the workplace.
		P270	Do not eat, drink or smoke when using this product.
Responses	:	P301+P330+	IF SWALLOWED: Rinse mouth. Do NOT induce
		P331	vomiting.
		P303+P361+	IF ON SKIN (or hair): Take off immediately all
		P353	contaminated clothing. Rinse skin with water or
			shower.
		P363	Wash contaminated clothing before reuse.
		P304+P340	IF INHALED: Remove person to fresh air and keep
			comfortable for breathing.
		P316	Get emergency medical help immediately.
		P321	Specific treatment (see section 4 on this SDS).
		P305+P354+	IF IN EYES: Immediately rinse with water for
		P338	several minutes. Remove contact lenses, if present
		D217	and easy to do. Continue Rinsing.
		P317	Get medical help.
		P302+P352	IF ON SKIN: Wash with plenty of water.
		P333+P317	If skin irritation or rash occurs: Get medical help.
		P362+P364	Take off contaminated clothing and wash it before
		P308+P316	reuse. IF exposed or concerned: Get emergeney medical
		1 300 - 1 310	IF exposed or concerned: Get emergency medical help immediately.
Storage		P405	Store locked up.
Disposal	÷	P501	Dispose of contents/container to an approved waste
- r	•		disposal plant in accordance with
			local/regional/national/international regulations.
			<i>G</i>

2.3 Other hazards

2.6% of the mixture consists of ingredient(s) of unknown acute toxicity (oral).

Harmful to aquatic life with long lasting effects.

Repeated or prolonged skin contact may cause allergic reactions with susceptible persons. Use of alcoholic beverages may enhance toxic effects.

Section 3: Composition/Information on Ingredients

Section 4 : First-aid Measures

4.1 Description of First Aid Measures

Alu Measules					
: Remove to fresh air. Get medical attention immediately if symptoms occur.					
: Wash off immediately with soap and plenty of water for at least 15 minutes. May cause an allergic skin reaction. In the case of skin irritation or allergic reactions see a physician.					
: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes keep eye wide open while rinsing. Remove contact lenses, if present and easy to do. Continue rinsing. Do not rub affected area. Seek immediate medical attention/advice.					
: Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. DO NOT induce vomiting. Call a physician.					
4.2 Most Important Symptoms/Effects					
: Burning sensation, itching, rashes, and/or hives.					
: Burning sensation, itching, rashes, and/or hives.					

4.3 Protection for Person who gives First-Aids

Avoid contact with skin, eyes or clothing. Use personal protective equipment as required. Wear personal protective clothing (see section 8).

4.4 Indication of Immediate Medical Attention and Special Treatment Needed Show this safety data sheet to the doctor in attendance. Immediate medical attention is required. May cause sensitization of susceptible persons. Treat symptomatically.

Section 5: Fire-Fighting Measures

5.1 Extinguishing Media		
Suitable Extinguishing Media	:	Use extinguishing measures that are appropriate to local
		circumstances and the surrounding environment.
Inappropriate Extinguish Media	:	No information available.
5.2 Specific Hazards Arising from	:	Thermal decomposition can lead to release of irritating gases and
the Chemicals		vapors.
5.3 Special Extinguishing Method	:	Sensitivity to mechanical impact: No
		Sensitivity to static discharge: No
5.4 Special Protective Actions for	:	As in any fire, wear self-contained breathing apparatus
Fire-fighter		pressure-demand, MSHA/NIOSH (approved or equivalent) and
-		full protective gear.

Issue Date: Revised Date:

Page 4 of 13

Section 6: Accidental Release Measures

6.1 Personal Precautions, Protective Equipment and Emergency Procedures

Protective Equipment	÷	Refer to protective measures listed in Section 7 and 8. Prevent
		further leakage or spillage if safe to do so.
Appropriate Procedure	:	Avoid contact with skin, eyes or clothing. Ensure adequate
		ventilation. Use personal protective equipment as required.
Emergency Procedure	:	Evacuate personnel to safe areas.
6.2 Environmental Precautions	:	Refer to protective measures listed in Section 7 and 8. Prevent
		further leakage or spillage if safe to do so.
6.3 Methods and Materials for Contai	nm	ent and Cleaning up
For Containment	:	Prevent further leakage or spillage if safe to do so.
For Cleaning up	:	Soak up with inert absorbent material. Pick up and transfer to
		properly labeled containers.
Other Information	:	Not available

Section 7: Handling and Storage

7.1 Precautions for Safe Handling	
General Precautions	: Use personal protection equipment. Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Take off contaminated clothing and wash before reuse.
General Hygiene	: Do not eat, drink or smoke when using this product.
7.2 Conditions for Safe Storage	
General Information	: Keep containers tightly closed in a dry, cool and well-ventilated place. Store locked up. Keep out of the reach of children.
Storage Conditions	: Do not store with strong acids, strong oxidizing agents and/or strong bases.
Other Information	: Not available

Section 8: Exposure Controls/Personal Protection

8.1 Oc	cupational	Exposure	Limits
--------	------------	----------	--------

1 Occupational Exposure I

MINE	e	23 mg/m	[skin]	[skin]
MINERAL OIL	TWA : 5 mg/m ³ (IHL; excluding metal working fluids, pure highly and severely refined) (For poorly and mildly refined: exposure by all routes should be carefully controlled to levels as low as possible.)	2500 mg/m ³	TWA: 5 mg/m ³ , ST 10 mg/m ³	TWA: 5 mg/m ³

ACGIH TLV: American Conference of Governmental Industrial Hygienists – Threshold limit value.

OSHA PEL: Occupational safety and Health Administration - Permissible Exposure Limits Immediately Dangerous to Life or Health.

NIOSH IDLH: The National Institute for Occupational Safety and Health - Immediately Dangerous to Life or Health Concentrations.

Ene of ficulti concentrations.		
8.2 Engineering Controls	:	Showers
		Eyewash station
		Ventilation system
8.3 Individual Protection Measures		
Eye/Face Protection	:	Tight sealing safety goggles.
Skin Protection	:	Wear protective gloves and protective clothing. Long sleeved clothing. Impervious gloves.
Respiratory Protection	:	No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.
Thermal Hazard	:	Not available
Other Requirements	:	Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/face protection. Do not eat, drink or smoke when using this product. Wash hands before breaks and immediately after handling the products.

Section 9: Physical and Chemical Properties

Physical State	:	Solid (Cream)	
Color	:	White to yellowish white	
Odor	:	Characteristic odor

Other Information	:	No information available	

Section 10: Stability and Reactivity Reactivity

: No data available

Page 6 of 13	
--------------	--

Ver. 1	Page 6 of 13
Chemical Stability	: Stable under recommended storage conditions.
Possibility of Hazardous Reactions	: None under normal processing.
Conditions to Avoid	: None known
Incompatible Materials	: Oxidative agent and acid materials.
Hazardous Decomposition Products	: Carbon oxides, ammonia, and/or nitrogen oxide.
Section 11: Toxicological Information	
Information on Toxicological Effects	
Acute Toxicity :	
CETETH-30	LD50(oral, rat) = 1260 mg/kg
AMMONIUM HYDROXIDE	LD50(oral, rat) = 350 mg/kg
STEARETH-2	LD50(oral, rat) = 25000 mg/kg
BEHENTRIMONIUM	LD50(oral, rat) = 1000 mg/kg
CHLORIDE	
2-METHYL-5-HYDROXYETHYL	LD50(oral, mice) = 1350 mg/kg
AMINOPHENOL	
p-AMINOPHENOL	LD50(oral, rat) = 671 mg/kg
p-PHENYLENEDIAMINE	LD50(oral, rat) = 80 mg/kg
	LC50(inhalation: dusts/mists, rat) = 0.92 mg/L
Skin Corrosion/Irritation :	
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 20 % aq. Sol.) (SIDS 2008).
BEHENTRIMONIUM	Corrosive to skin. Low concentration solution (1%) causes skin
CHLORIDE	irritation, and high concentration solutions ($\geq 10\%$) may cause
	inflammation, rash, etc.
AMODIMETHICONE	Causes skin irritation.
p-AMINOPHENOL	The skin irritation test using rabbits was reported that mild
	edema was induced 24 hours after application and recovered
	within 72 hours (primary stimulation score 0.2 (maximum
• DUENIVI ENEDIAMINE	value 8)) (SIAP 2010, HSDB Access on May 2017). Slightly irritant at 2.5 % and moderately irritant at 10 – 50 %
p-PHENYLENEDIAMINE	on rabbit and its PII was $1.4 - 3.4$ (BUA 97, 1995).
FRAGRANCE	No information available
Serious Eye Damage/Irritation :	No information available
PEG-32	Mild irritant (rabbit), but recovered within 24 to 48 hrs.
CETETH-30	Moderate irritation (Draize, Rabbit, RTECS).
AMMONIUM HYDROXIDE	Corrosive (rabbit, 28.5 % aq. Sol.) (HSDB (Access on June
Multional In Dicombe	2014)).
BEHENTRIMONIUM	Low concentration solution (0.1 - 1%) is strongly irritant to
CHLORIDE	eyes, and high concentration solutions ($\ge 10\%$) may cause
	severe burnings with turbidity or angiogenesis.
PARAFFIN	Slightly or mild irritant (rabbit, IUCLID, 2000 and RTECS,
	2008).
AMODIMETHICONE	Causes serious eye damage.
p-AMINOPHENOL	There is a report that it is irritating to human eyes (HSDB
r	Access on May 2017) and a report that mild irritancy was seen
	in eye irritation test using rabbits (SIAP 2010, HSDB Access
	on May 2017)
ISOPROPYL ALCOHOL	Mild to strong irritation (rabbit) (EHC, 1990, SIDS, 2002,
	PATTY 6th, 2012, and ECETOC TR48, 1998).
4-AMINO-2-HYDROXYTOLUEN	Shown slight reaction on conjunctiva on rabbit eye (HSDB,
E	2016).
p-PHENYLENEDIAMINE	Slightly irritant (Draize, rabbit) (BUA 97, 1995).
FRAGRANCE	No information available

Issue Date: 2020/3/31 Revised Date:

SODIUM SULFITE Respiratory or Skin Sensitization : p-AMINOPHENOL	Causes eye irritation. Slight irritation on rabbit eyes. There was a report causing bronchial asthma (HSDB (Access
4-AMINO-2-HYDROXYTOLUEN E p-PHENYLENEDIAMINE	on May 2017). It is stated that this substance is contained in hair dye and is a causative substance of contact dermatitis to barber and consumer (Contact Dermatitis 5th ed., 2011) and there are multiple case report on skin sensitization potential of this substance (SCCS 2011). Positive in mice LLNA (NTP, 2006) and allergic exzema by human patch test (HSDB, 2016). There are reports of workers who caused allergic asthma due to occupational exposure, inflammation in the pharynx due to direct stimulation. Also there is a report of asthma occurring due to exposure 3 months - 10 years even with a small amount (ACGIH (2001)). There is another report that this substance was sensitized to the skin and the respiratory tract which may
FRAGRANCE	cause asthma (PATTY (5th, 2001)). Listed as sensitizing substance at Japan Society for Occupational Health. No information available
Germ Cell Mutagenicity : p-AMINOPHENOL	Negative results were reported by in vivo domestic lethal test in rat and in vitro gene mutation test, but positive results are reported by in vivo micronucleus test in mouse, in vitro mouse lymphoma test and chromosome aberration test (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, Patty 6th 2012, NTP DB access on May 2017)
Carcinogenicity :	No information available
Reproductive Toxicity :: p-AMINOPHENOL	In a simple reproductive toxicity test by forced oral administration using rats, death of parental animals was seen (male 4/12 and female 2/12). Regression stop of sex cycle, extension of gestation periods, poor delivery rate and nursing behaviors were seen in parental rats that showed suppression on weight gain at a dose of 500 mg/kg/day. Its offsprings showed increased stillbirth, lower fertility rate and survival rate within first 4 days. (Existing chemical toxicity database of Ministry of Health, Labor and Welfare access on May 2017, SIDS 2010, SCCS 2011). On the other hand, the developmental toxicity test administered a dose mixed feeds to a pregnant rats on 0 to 20th days, increase in fetal death after implantation at dose lower than the dose showing suppression of weight gain to the mother animals was seen, but fetus did not show increase in teratogenesis although it showed skeletal morphogenesis and undeveloped renal papilla due to growth retardation (SIDS 2010, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006). However, as a result of forced oral administrations during the organ formation periods of pregnant rat, the mother animal showed suppression of weight gain at does greater than 85 mg/kg/day and teratogenicity in fetus, such as skeletal malformations, asthma, hydrocephalus, at dose of 250

Page 7 of 13

Issue Date: Revised Date: Page 8 of 13

ISOPROPYL ALCOHOL	 mg/kg/day (SCCS 2011). A test administered forcefully single oral dose to pregnant rats at 11th day of pregnancy showed abnormality in their tail at a dose showing the suppression of weight gain on mother animals (SIDS 2010, Risk Assessment by Ministry of the Environment Vol. 5: Temporary Hazard Assessment Sheet 2006). There was a report that pregnant hamsters administered showed no teratogenicity by oral administration but external malformation such as cerebral aneurysms and ocular or tail malformations were seen (SIDS 2010, Patty 6th, 2012, SCCS 2011, Risk Assessment Sheet 2006). Two generation test on rat by oral exposure showed decrease in copulation rate on parent and decrease in weight and increase in death rate (PATTY 6th, 2012 and SIDS (2002)).
STOT – Single Exposure AMMONIUM HYDROXIDE	: There is known neurological effect due to oral and dermal exposure, which normally limited to blurred vision on topically applied region, but severe exposure causes increase in concentration of blood ammonia, attack, coma, nonspecific diffuse brain disorder, loss in muscle strength, decreased deep
	tendon reflex, loss of consciousness, and death (ATSDR, 2004). This substance has a respiratory irritation and causes severe irritation and pain on airway mucosa. Also, severe corrosive effects are known for mouth, throat and stomach by oral route (HSDB, 2014).
ISOPROPYL ALCOHOL	This substance showed systematic hazardous effect including the central nervous depression such as lethargy, coma and respiratory depression, irritation on the alimentary canal, effect on the circulatory system such as blood pressure, body temperature decrease, and abnormal cardiac rhythm (SIDS (2002), EHC 103 (1990)).
PARAFFIN	Wax fume is mild irritant on eyes, nose, and throat (PATTY5th, 2001)
p-PHENYLENEDIAMINE	Ingestion of this substance on human showed breathing difficulty and edema on face, neck, tongue and throat, increase of CPK in blood, hypouresis, renal tubular degeneration and rhabdomyolysis. Then, subject caused acute kidney failure and death (DFGMAK-Doc.6, 1994).
STOT – Repeated Exposure	:
ISOPROPYL ALCOHOL	Vapor exposure of this substance on rat for 4 month showed decrease in number of leucocyte at 100 mg/m ³ , and pathologic effect on organs of respiration such as lung and respiratory tract, liver and spleen at 500 mg/m ³ (EHC 103 (1990)).
MINERAL OIL	Effects on liver and mesenteric node by repeated oral exposure test using rat (IUCLID, 2000) and on lung due to aerosol exposure on rat (US HPVIS, 2011).
p-AMINOPHENOL	There is no clear report on humans. In the 28-day repeated dose toxicity study by oral gavage using rats, brown urine, urinary sediment epithelial cells, absolute and relative weight values of kidney, basophilic tubule were seen at 100 mg/kg/day which is equivalent to 31 mg/kg/day for 90-day study, and lower red blood cells, hematocrit value and hemoglobin concentration, a high value of reticulocyte count, a liver weight increase, a white streak at the kidney

Domestic Substance list (DSL)	:	Substances comply or are exempt.
US Federal Regulation		
Title III of the Superfund Amendments	:	Section 313 of Title III of the Superfund Amendments and
and Reauthorization act of 1986		Reauthorization act of 1986 (SARA). This product contains
(SARA 313)		a chemical or chemicals which are subject to the reporting
		requirements of the act and title 40 of the Code of Federal
		Regulations (CFR), Part 372.

Regulations (CFR), Part 572.					
Chemical Name		SA	SARA 313 – Threshold values (%)		
AMMONIUM HYDROXIDE		1.0	as ammonia		
ISOPROPYL ALCOHOL		1.0			
p-PHENYLENEDIAMINE		1.0			
SARA 311/312 Hazard Category	:	Acute health hazard Yes			
	Chronic health hazard No		No		
		Fire hazard		No	
		Sudden release of pressure hazard No		No	
		Reactive hazard		No	
Clean Water Act (CWA)	:	This product contains the substances which are regulated as			
		pollutant pursuant to the Clean Water Act (40 CFR 122).			
Clean Air Act (CAA)	:	This product contains the substances which are regulated as			
			to the Clean Air Act	· · · · · · · · · · · · · · · · · · ·	
Comprehensive Environmental	:	This material, as supplied, does not contain substance			
Response Compensation and Liability		regulated as hazardous substance under the Comprehensive			
Act (CERCLA)		Environmental Response Compensation and Liability Act			
		(40 CFR 302).			
Hazardous Substance		Statutory Code*	RCRA Waste No.	Final RQ Pounds	
AMMONIUM HYDROXIDE		1	-	1000 lb (454 kg)	

p-PHENYLENEDIAMINE 3 5000 lb (2270 kg) * According to 40 CFR 302, The "Statutory Code" column indicates the statutory source for designating

each substance as a CERCLA hazardous substance:

"1" indicates that the statutory source is section 311(b)(2) of the Clean Water Act,

"2" indicates that the source is section 307(a) of the Clean Water Act,

"3" indicates that the source is section 112 of the Clean Air Act, and

"4" indicates that the source is section 3001 of the Resource Conservation and Recovery Act (RCRA). **US State Regulations**

California Hazardous Waste Code : 135 (unspecified aqueous solution) This product contains one or more substances that are listed with the state of California as hazardous waste

Tuble:				
Chemical Name	California Hazardous Waste Code			
AMMONIUM HYDROXIDE	X, C			
ISOPROPYL ALCOHOL	X, I			
p-PHENYLENEDIAMINE	X			

California Hazardous Waste Code: X – Toxic, C – Corrosive, I – Ignitable, R - reactive California Proposition 65 : This product does not contain any Proposition 65 chemicals. US State Right-to-Know Regulations :

Chemical name	New Jersey	Massachusetts	Pennsylvania	Rhode Island	Illinois
AMMONIUM HYDROXIDE	Х	Х	Х	-	Х
LANOLIN	-	-	Х	Х	-
PARAFFIN	Х	Х	Х	Х	-
MINERAL OIL	Х	Х	Х	Х	-
ISOPROPYL ALCOHOL	Х	Х	Х	Х	-
p-PHENYLENEDIAMINE	Х	X	Х	X(skin)	Х

Section 16: Other Information

NFPA (National Fire Protection	: Health hazard	3
Association Code)	Flammability hazard	0
	Instability hazard	0
	Special hazards	COR
HMIS (Hazardous Materials	: Health	3
Identification System)	Flammability	0
	Physical hazard	0
	Personal protection	Х
